

# MILESTONE 1: INTENT & SCOPE

What exists at a high level — who is it for, what pages or states exist, and what do users do?

| Audience & Goal                                                                                                                                                                                                                                                                                                                                                                           | Pages / States List                                                                                                                                                                                                                                                                                                                                                                                                                                    | User Actions List                                                                                                                                                                                  |
